

Glastonbury Spring Water – COVID 19

Our customers & employees health, safety, & wellbeing are paramount to us and we take the current Coronavirus situation extremely seriously. During the past few weeks our staff have been instructed to work to the highest possible hygiene standards whilst at work & on customers premises. Such things as cooler sanitisations have never been more important & we continue to work closely with our governing body, The Water Dispenser & Hydration Association.

Unfortunately these measures are no longer enough & in line with Government advice, staying at home is imperative to slow the spread of the virus. Therefore with immediate effect Glastonbury Spring Water will no longer deliver to customers premises until the current situation changes.

If any of our customers have questions, concerns, or are a critical environment such as a doctors or hospital who requires an emergency delivery, please contact us at sales@glastonburyspringwater.co.uk .

This has not been an easy decision & we hope customers will appreciate the steps we are taking. We wish our customers the very best through these challenging & difficult times. Thank you for your understanding & we look forward to resuming our service to you as soon as safe to do so, take care.

The Glastonbury Spring Water Team.
